

All parking needs, from single cars to entire company areas, can be solved quickly because of its vertical modular structure. It is possible to install structures:

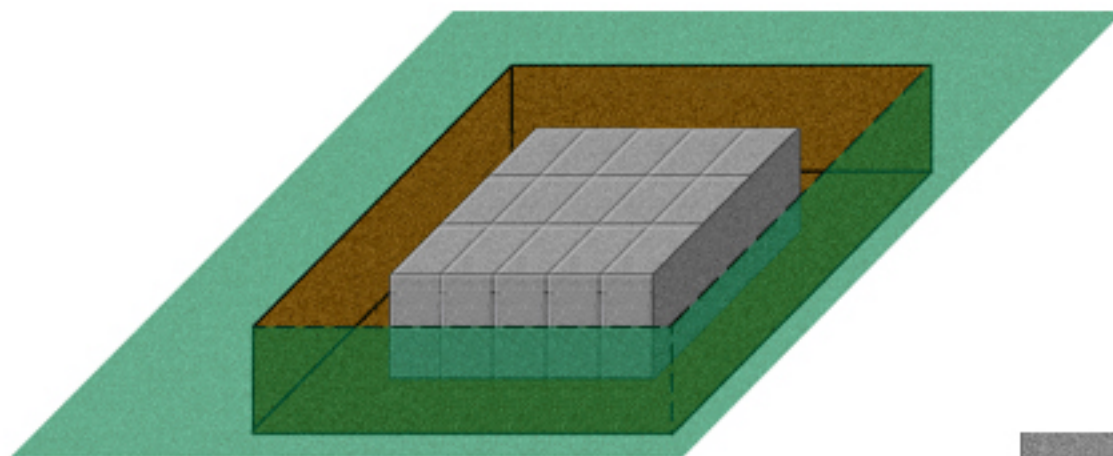

- Individual single-side parking space with the roof projection reduced because of space problems;
- Single-front parking space with the roof projection at maximum extension (see drawing A);
- Double-front parking space with the roof projection at maximum extension (see drawing B).

CEMENT paving, min. thickness

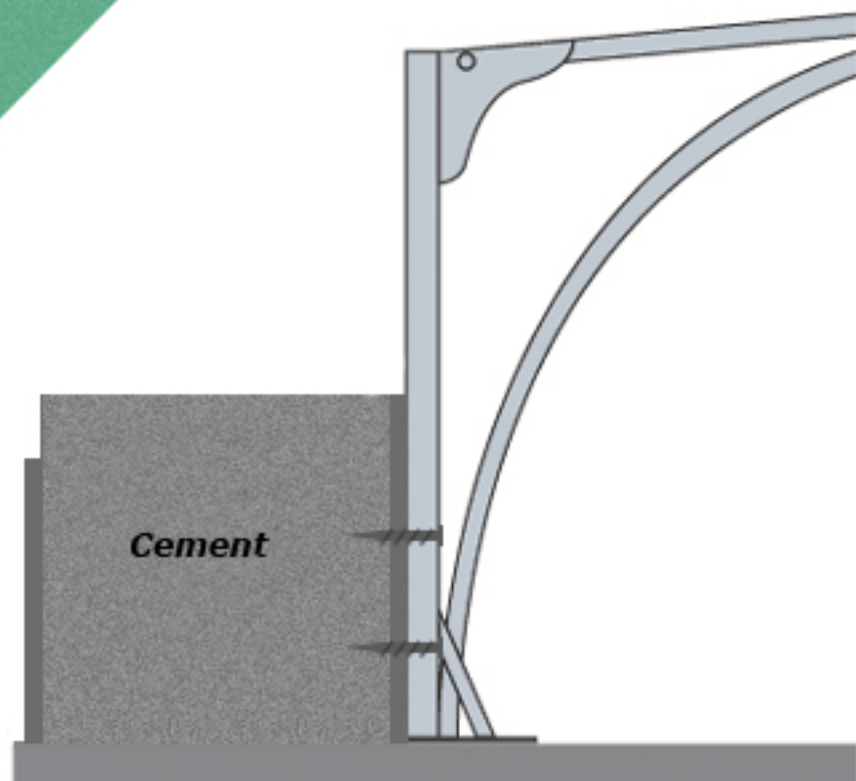

Paving with various surfaces

With UNMOVABLE fixing buried with concrete base

100 x 100 x 100

With MOBILE fixing on surface

Excavation for reinforcement (iron round bar diameter 8 mm)
